

INSTRUCTIONS

How to make this foldable card?

- Get the print of your desired page. (B&W or Colored)
- You can now cut out the whole "**Card Area**"(labelled).
- Now you can either choose to cut along the border of Reindeer's image or keep or use the entire "card area".

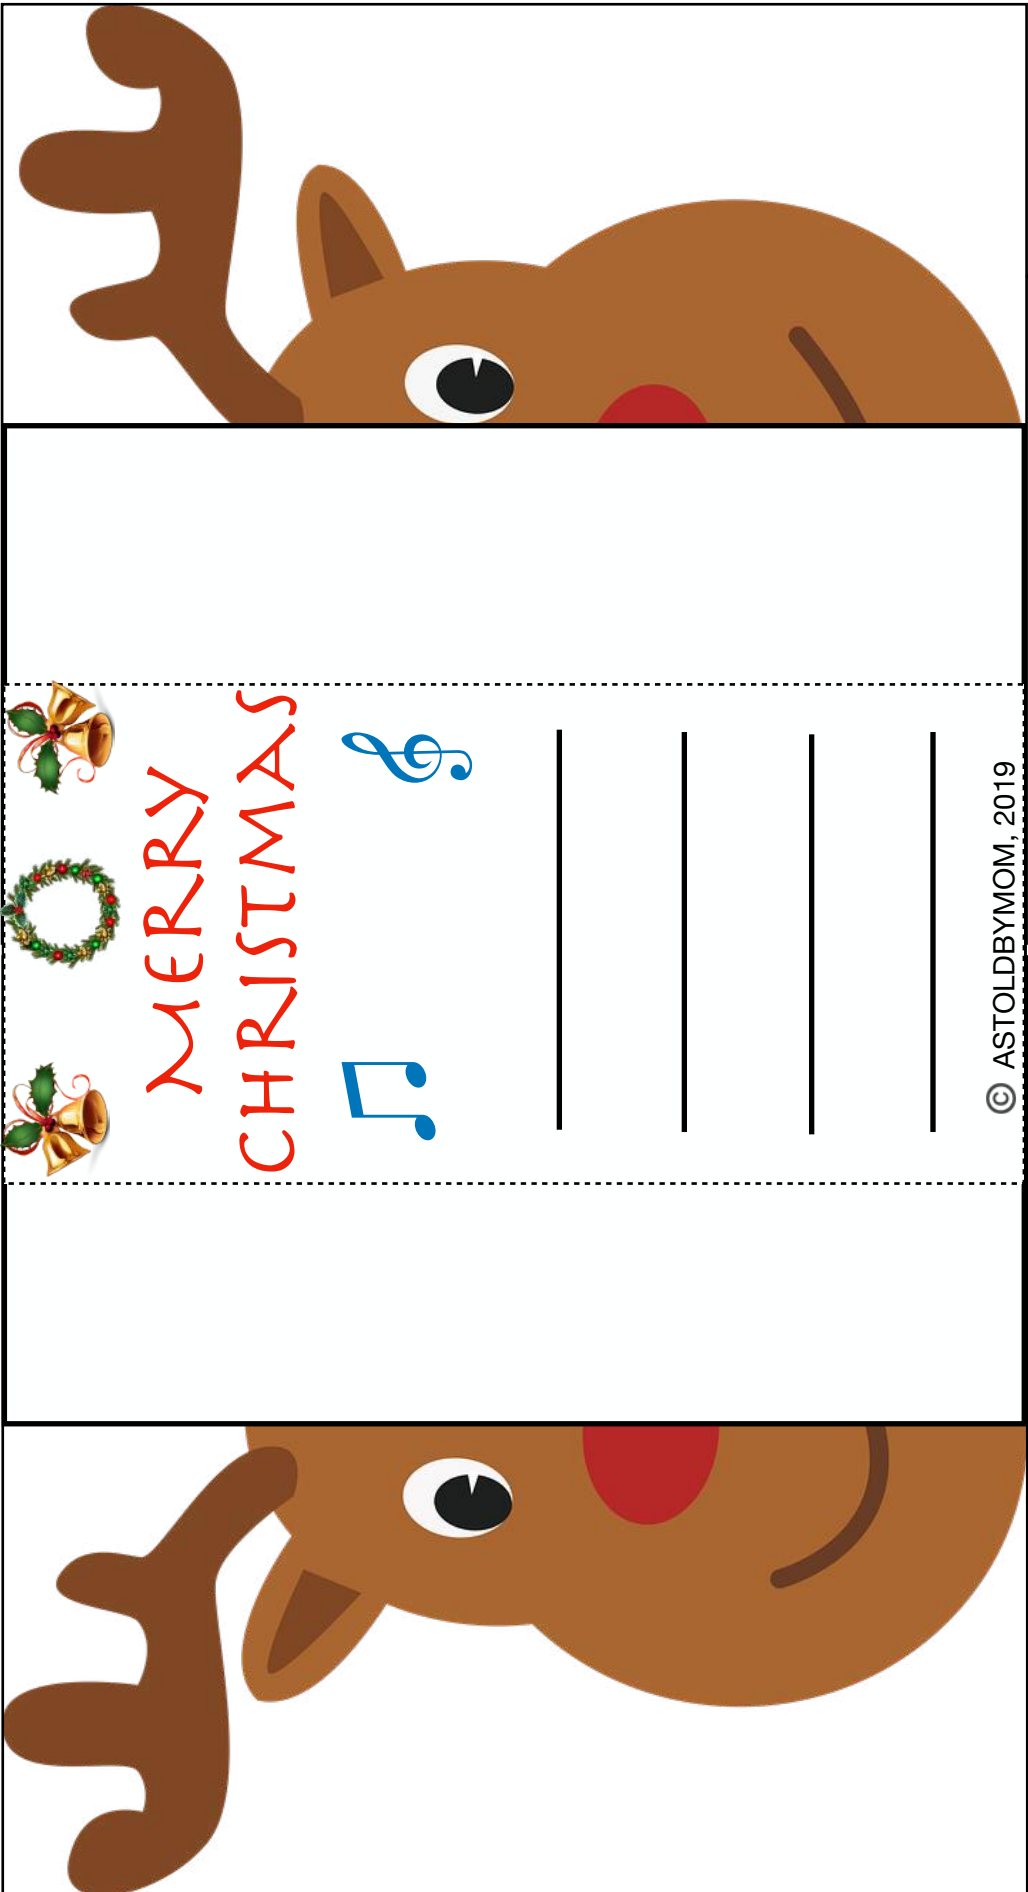

Note: The following part is important & is to be done very carefully.

- Now fold the paper inward along both the dotted lines.
- Then fold the paper outward along the solid lines, so that Reindeer's image stays out.

Voila, your Christmas DIY Card is ready.

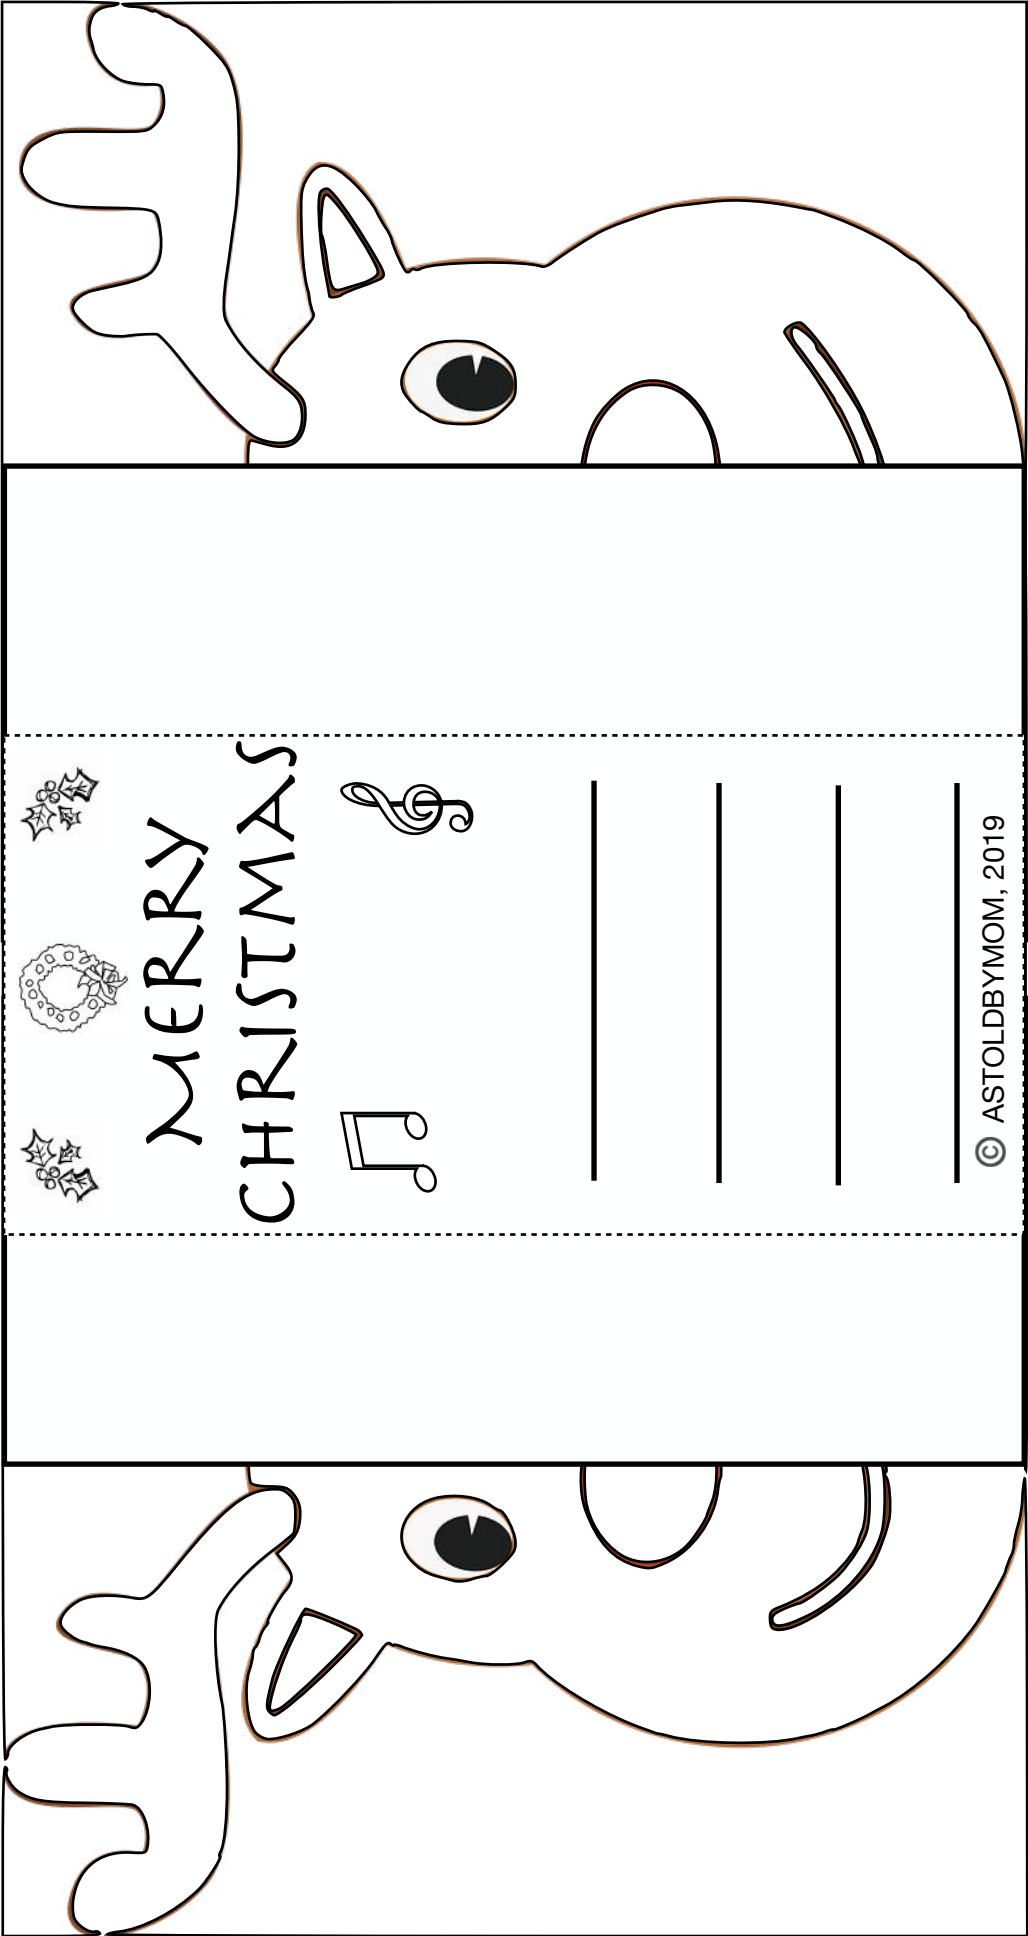

Decorate it?

- >> The black & white image can be colored by kids themselves.
- >> If you wish to keep the background too, you can put some colorful stickers there.
- >> Now just write a beautiful message along with your name in the end and send it across to your near and dear.
